EXHIBIT A

STATEMENT OF WORK 1

Connected Financial Assistant and Office TV Dashboard

This Statement of Work ("SOW") is entered into by Bryce Labs LLC ("Developer") and _____ ("Company") under their Master Services Agreement ("MSA"), executed with this SOW. It becomes effective on the date of the last signature below. Capitalized terms have the meanings given in the MSA.

1. Description of Services

(a) Purpose. Developer will connect the financial systems Company and the Affiliated Companies already use to a private assistant that Company can ask questions from its phone, and to a dashboard on Company's office TV. Company keeps using its existing systems; nothing is replaced. The work is driven by what Company asks for and the time available under the plan Company is on.

(b) Starting work. Developer will begin with the following, in the order Company prioritizes and within the time available under the Active Development plan:

- **Accounting connections.** QuickBooks Online connections for Velocity Builders LLC, Tiago LLC and Dirt Kings.
- **Farm store connection.** A read-only connection to Clover for Heritage Homestead LLC's farm store, through a private, read-only Clover application that Company authorizes. Clover stays as Company runs it.
- **Bank connections.** Read-only connections for up to six (6) bank accounts across the companies, through Plaid or a comparable bank-data service.
- **Thirty Acres tracking.** Rent received from Thirty Acres LLC's tenants and its expenses, from the connected bank feed or a simple sheet Company provides.
- **Bloomfield Property Group.** Its company records, from a source the Parties agree on.
- **Phone assistant.** A private application on Company's phone where Company can type or speak a question and get an answer from the connected data, and change what is shown on the office TV.
- **Office TV dashboard.** A dashboard on Company's existing office TV showing all six companies at once, with charts, plus alternate views (for example, one company, the farm store, or the cash trend) selectable from the phone. Company chooses what appears. Developer supplies and sets up the computer and KVM that run it under Section 1(h).
- **How-to sheet.** A short guide for Company and anyone Company wants using the system.

(c) Requests and review. Company decides what it wants the system to answer and show, and may add, change or drop requests at any time. Developer will show completed work in the weekly update or demo. Company may raise anything that is not working as expected, and Developer will put it in the queue under Section 1(d). There is no fixed list of questions or deliverables that must be completed by a set date.

(d) Active development. Throughout the time Company is on the Active Development plan, Developer will keep one substantial improvement in active development at a time from a prioritized queue that Company

and Developer maintain together. This includes a weekly update or short demo and two (2) remote working sessions each month of about sixty (60) to ninety (90) minutes. Company may send ideas by text or email at any time; they go into the queue for prioritization. Larger improvements are divided into reviewable stages. The Parties may complete, pause or replace the active improvement by agreement before starting another. Queued improvements do not require a separate development fee or a new Statement of Work. Queue placement does not guarantee a fixed completion date. Maintenance Services under Section 1(e) are included.

(e) Maintenance Services. Monitoring, keeping the connections working, fixing defects, security updates, and hosting and backups of the system. Support is provided during Developer's ordinary Arizona business hours; guaranteed response or recovery times require a separate written agreement.

(f) Not included. Unless selected as an improvement under Section 1(d) or agreed in writing: bookkeeping or replacing Company's bookkeeper; replacing QuickBooks or Clover; initiating payments, transfers or other movements of money; investment accounts and market alerts; email, text-message or iMessage integration; construction pipeline tracking; equipment and property tracking and inter-company leases; work on existing custom software; and a dedicated app for a TV platform (for example, an Apple TV app). External services, equipment and usage costs for later improvements remain subject to Section 1(h).

(g) Company participation. Company will: send QuickBooks Online invites for the three companies listed in Section 1(b); approve the read-only Clover connection; join a short session to connect its bank accounts; provide the Thirty Acres rent sheet or account access; share its questions and what it wants on the TV; provide a spot near the TV with power and internet; designate a contact for routine priorities; and review deliveries promptly. Company remains responsible for its accounting, tax and financial decisions.

(h) All-inclusive items. The monthly fees under Section 2 include the following, with no separate bill:

- **Computer hardware.** The computer that runs Company's office TV, plus the KVM, selected by Developer and confirmed with Company before purchase. Title to the hardware passes to Company when the Initial Term fees are paid in full.
- **Cloud services.** Private cloud networks (VPCs), compute, hosting and backups for the system.
- **AI usage.** Up to two hundred dollars ($200) per month of AI service usage for the assistant. Developer will tell Company before usage is expected to exceed that amount and will not bill any excess without Company's prior written approval.
- **On-site work.** Up to five (5) hours of on-site work, such as setting up the office TV, in total. Additional on-site time is billed at two hundred dollars ($200) per hour, and Developer will get Company's approval before going over five (5) hours.

Any other third-party cost requires Company's prior written approval of the charge or a budget ceiling before Developer incurs it on Company's behalf. This Section amends MSA Section 4 for this SOW.

(i) Research credit documentation. On Company's request, Developer will provide documentation reasonably needed for Company and its tax advisors to evaluate and support a research credit claim for work performed under the Active Development plan, including descriptions of the work performed, the technical uncertainties addressed and approaches tried, timelines, and fees attributable to active development by period. Developer will not claim a research credit for work that Company pays for under this SOW. Tax treatment is governed by MSA Section 10(c).

2. Fees and Service Term

(a) Active Development plan. Three thousand dollars ($3,000) per month.

(b) Initial Term. The initial term is three (3) months, beginning on the kickoff date the Parties confirm in writing after execution and receipt of the first month's fee (the "Initial Term"). Company commits to the full Initial Term, a total of nine thousand dollars ($9,000), which is a minimum commitment under MSA Section 5(e). It does not restrict termination for an uncured material breach or the refund available under MSA Section 5(f). Delays caused by Company after kickoff do not pause or extend the Initial Term.

(c) Billing. Developer will invoice each month's fee in advance. The first invoice is issued on execution and is due before kickoff. Later invoices are issued at the start of each service month and are due within fifteen (15) days of the invoice date.

(d) After the Initial Term. Unless ended or changed under this Section or the MSA, the Active Development plan continues month to month at three thousand dollars ($3,000) per month. Either Party may end the Services for convenience on thirty (30) days' written notice, which may be given during the Initial Term to take effect on or after its end.

(e) Maintenance plan. After the Initial Term, Company may switch to the Maintenance plan at seven hundred fifty dollars ($750) per month by written notice at least thirty (30) days before the start of the service month in which the change applies. The Maintenance plan includes the Maintenance Services and the all-inclusive cloud services and AI usage under Section 1(h), and no new features or queued improvements. Company may switch back to the Active Development plan by written notice, effective at the start of the next service month.

(f) End of service. MSA Section 7 governs ownership and handoff. When Services end, Company keeps ownership of paid Work Product and receives its data export and a source-code copy as described there. Hosting, support and updates continue only while Services continue.

3. Project Contacts and Signatures

Company project contact: Craig Bloomfield. Title: _____. Phone: _____. Email: _____. Mailing address: _____.

Developer project contact: Bryan J. Bryce, President, Bryce Labs LLC. Phone: (928) 432-1886. Email: bryan@brycelabs.com. Physical: 4850 W Central RD, Central, AZ 85531. Mailing: PO Box 506, Central, AZ 85531.

Each contact may coordinate routine priorities and reviews. Commitments to new fees, contract amendments or optional projects requiring an additional fee must be approved by authorized representatives of both Parties. Company may designate an operational contact in writing without changing the signatories or fees.

By signing, each Party accepts this SOW and the MSA referenced above. Electronic signatures and counterparts are permitted.
